

This is the Black Rose Caving Club's second journal, and covers some of our activities between 2013 and 2018.

Formed in 2001, Black Rose has been an unstoppable tidal wave of speleological activity from the beginning. Undoubtedly the main purpose of this club is to undertake challenging sporting trips, primarily in the Yorkshire Dales; but, as you will see from the following pages, we have made a number of interesting discoveries in the last few years, not only in this country but around the world.

## Contents

<b>Discoveries in the Northern Dales, by Chris Scaife</b>	<b>5</b>
▶ Xenophobia Cave	5
▶ Butlers' Matrimonial Hole	6
